

ADITYA MADHAVRAO KHAIRWAD

+91 9527261926 | aditya.k.forwork@gmail.com | [LinkedIn](#) | [Portfolio](#) | [GitHub](#)

EDUCATION

MBA – Operations Management | Symbiosis Institute of Operations Management (SIU)
B. Tech – Production Engineering | SGGSI&T, Nanded (SRTM University)

2024 – 2026 | CGPA: 7.42
2017 – 2021 | CGPA: 7.82

WORK EXPERIENCE

Accenture | Business Architecture Senior Analyst Intern | Pune

Apr 2025 – Jun 2025

Project: Design & Standardization of AMS Solutioning Framework for Client Engagements

- **Designed a standardized AMS solutioning template** spanning 7+ client touchpoints (Scope of Services, Delivery Model, Governance, SLAs, Risk Management) for digital supply chain transformation engagements.
- **Built a reusable AMS proposal playbook** adopted by Kinaxis teams, reducing proposal turnaround time by 35% and improving pre-sales efficiency across client engagements.
- **Engineered a resource estimation & capacity planning framework** using ticket volume analysis and complexity classification to forecast resourcing needs, improving cost allocation and workload distribution.
- **Structured a multi-tiered governance model** with RACI ownership and escalation matrices, enabling transparent stakeholder reporting and faster issue resolution across program management layers.
- **Mapped end-to-end AMS service scope** (incident, problem, change, enhancement, monitoring) ensuring standardized, scalable, client-ready service delivery aligned with SLA commitments.

Infosys Ltd. | Systems Engineer | Pune

May 2022 – Aug 2023

- **Executed high-volume financial data migrations (100+/week)** using SQL across diverse database environments, ensuring data integrity and adherence to SLAs with rigorous acceptance testing.
- **Streamlined development lifecycle operations** by provisioning 10+ DEV & TST environments weekly via DMS, reducing environment setup time and improving delivery velocity.
- **Implemented SSO authentication** and applied 8+ product patches annually, boosting login operational efficiency by 45% and strengthening system security and reliability.
- **Deployed Pure Internet Architecture (PIA)** ensuring seamless multi-server access for stakeholders and driving measurable improvements in system accessibility and KPIs.

PROJECTS

AI Applications & Automation Suite | LLMs, APIs, n8n, Firebase, Supabase, Vercel

Feb 2026 – Ongoing

- **Built and deployed AI-driven applications** — chatbot, [AI interviewer](#), [Job aggregator](#), and multi-agent assistant (JARVIS) using LLMs, prompt engineering, and REST APIs to automate research and information workflows.
- **Integrated scalable end-to-end backend infrastructure** using Firebase/Supabase (data), n8n (workflow automation), and Vercel (deployment), enabling context-aware AI responses and automated evaluation pipelines.

[SavoryRoots Provisions – FMCG Supply Chain Simulation](#) | Python, Power BI, ML (Prophet + XGBoost) Dec 2025 – Jan 2026

- **Designed a data-driven supplier selection framework** using Kraljic Matrix, MCDM, and supplier scorecards supported by Power BI dashboards tracking cost, quality, risk, and delivery KPIs.
- **Built a hybrid ML demand forecasting model (Prophet + XGBoost)** across multi-SKU, multi-store retail data, improving forecast accuracy by 22% and generating plant-level weekly demand signals.
- **Translated forecasts into end-to-end operations plans** including MPS, RCCP, OEE, and scenario analysis, simulating S&OP and production decision-making for a real FMCG network.

Sales Forecasting & Productivity Improvement – Stone Crusher Plant

Feb 2021 – May 2021

- **Applied SMA, WMA, and Exponential Smoothing forecasting models** (MFE, MAPE, MAD metrics) achieving a 9.7% reduction in forecasting error over a 3-month period.
- **Proposed plant layout optimization strategies** using flow process charts and string diagrams, potentially enhancing machine utilization by 12.44% and improving workflow efficiency.

SKILLS

Technical: LLMs, Prompt Engineering, APIs, Data Analysis, Python, SQL, HTML, GenAI, Power BI, Excel, SAP

Tools & Platforms: Supabase, Firebase, n8n, Vercel, GitHub, JIRA, SharePoint, Figma, Kinaxis

Domain: Supply Chain Strategy, Demand Planning, Forecasting, S&OP, Operations Optimization, Business Transformation

CERTIFICATIONS & ACHIEVEMENTS

- **Kinaxis Certified:** [Author L1](#), [Contributor L1](#), [Demand Planning Specialist](#), [Aggregate Supply Planning Specialist](#) (2024–2025)
- **Rutgers University (Coursera):** [Supply Chain Operations](#) | [Supply Chain Logistics](#) | [Supply Chain Sourcing](#) (2024)
- **Flipkart Wired 9.0** – National Semi-finalist, Supply Chain Track (2026) | **GATE AIR 420** – Production Engineering (2022)
